

TimeControl®

Integrate TimeControl 6 and Primavera's P6
for an integrated project environment

Introductions

- ✓ HMS: Founded in 1984
- ✓ TimeControl released to market in 1994
- ✓ Partners with:
 - ✓ Oracle-Primavera since 1997
 - ✓ Microsoft since 1995
 - ✓ Deltek (Welcom) since 1985

Chris Vandersluis

Why track time?

“If you can measure something, then you have some control over it.”

Rheticus

TimeControl®

TimeControl Principles

- ✓ Easy for the end user
- ✓ Robust functionality available to who needs it
- ✓ Highly flexible
- ✓ Highly connectable
- ✓ Fast to deploy
- ✓ Easy to maintain

TimeControl Overview

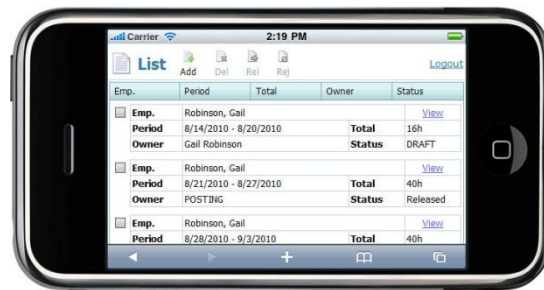

- ✓ TimeControl is timesheet software designed to serve the needs of Finance and Project Management at the same time.
- ✓ TimeControl includes links to Oracle/Primavera's P6 and earlier versions of Primavera starting with P3
- ✓ TimeControl also includes a module to link to virtually every Finance, HR and Payroll system including Microsoft Dynamics, Timberline, SAP, Oracle Financials, PeopleSoft and more

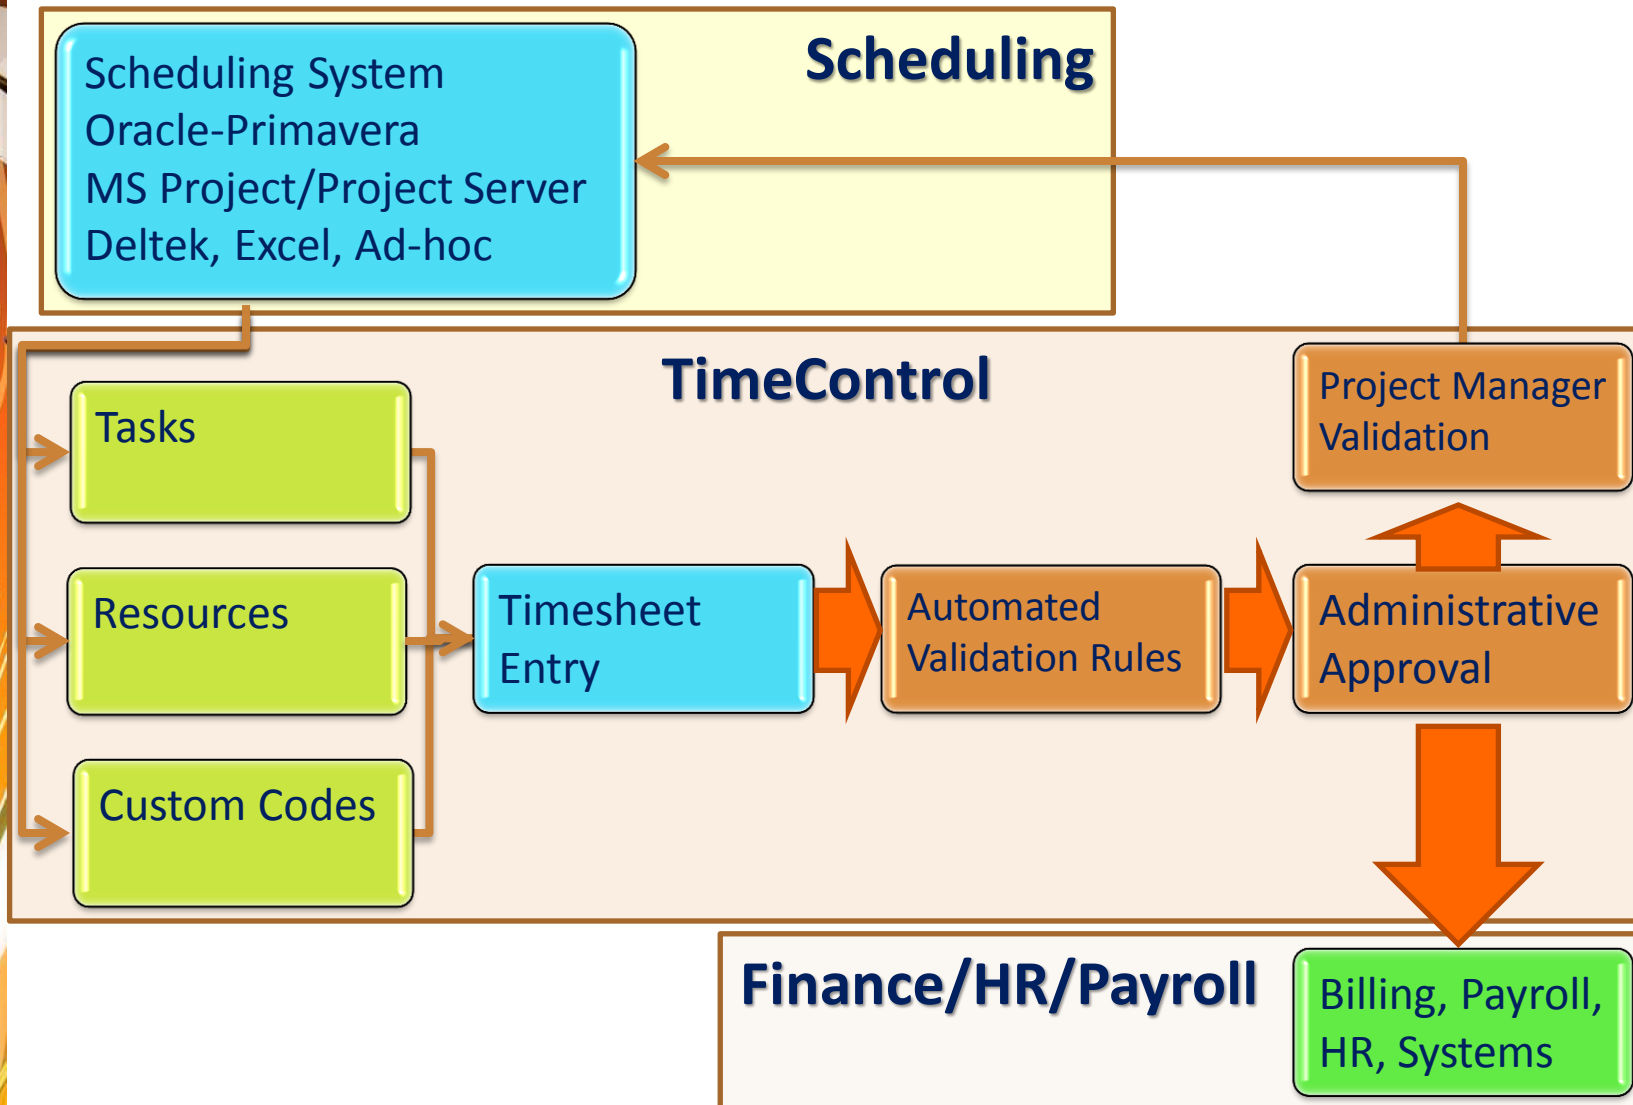

Demonstration

Smartphone / Tablet Support

- ✓ Blackberry
- ✓ iPhone
- ✓ Android
- ✓ Windows7 Mobile
- ✓ iPad

The Matrix Approval Process

Advantages of using TimeControl

- ✓ **Auditable Historical data**
TimeControl includes historical data on all timesheet data regardless of what changes or deletions were made in the planning system. This means that if a task is deleted or moved, the actuals are not changed
- ✓ **Track controllable edits to posted timesheet data**
TimeControl allows audited Debit/Credit changes to previous timesheets which are tracked as changes to the original timesheet
- ✓ **Automated business validation rules**
TimeControl includes unlimited automated validation Rules which allows an organization to define what makes an acceptable timesheet. This can include simple rules such as “no more than 24 hours per day” or complex rules such as “no overtime unless you are a wage employee and have done at least 8 hours of regular time today”.

Advantages of using TimeControl

✓ Unlimited Rates

TimeControl allows an unlimited number of rates per employee. Each rate maintains two values. They are typically used for internal or actual cost and external or billing cost.

✓ Project and Non-project time

TimeControl can track both project items from the scheduling system and non-project items such as overhead types. There is no limit to the number of project or non-project items that can be included.

✓ Unlimited user-defined fields

TimeControl allows an unlimited number of user defined fields to be added to any table (such as the employee list or task items).

✓ Multilingual

TimeControl includes a multi-lingual client which includes many languages by default and a module to add your own language translations.

Advantages of using TimeControl

- ✓ **DCAA Compliance**

TimeControl is DCAA (Defense Contract Audit Agency) compliant

- ✓ **Sarbanes-Oxley Compliance**

TimeControl is a powerful tool for Sarbanes-Oxley compliance in order to conform to SEC rules for internal software development and deployment for any company publicly traded in the US

- ✓ **Other Government requirements**

TimeControl complies also with numerous government standards including the “European Work Rules”, FMLAs and “California Work Rules” along with many others

- ✓ **Extensive Approvals**

TimeControl supports multiple levels of manual approval with each level and the path for each employee defineable at the employee level

- ✓ **Matrix Approvals**

TimeControl supports HMS Software’s unique “Matrix Approval Process for Labor Actuals™” which allows timesheet data to be approved by both line or resource managers and projects managers

Advantages of using TimeControl

- ✓ **Resource assignment options**

TimeControl supports both individual and group resource identification. Timesheet data can be sent for an individual's resource code group multiple employees into one generic resource code

- ✓ **Hierarchical display for high data volume**

TimeControl displays projects, rates and tasks in a hierarchical tree format. This allows support of a tremendous volume of data

- ✓ **Link to invoicing**

TimeControl's financial-quality data is ideally suited for invoicing and TimeControl's Link module allows output to be sent to virtually any billing system or the billing module of any major Finance system

- ✓ **Multiple project management system links**

TimeControl supports multiple project management links simultaneously. A project environment which includes both Primavera and Microsoft Project, for example, could be supported by TimeControl at the same time. End-users would simply see a list of tasks

Primavera link features

- ✓ Bi-directional link
- ✓ Link on demand or on schedule
- ✓ Update:
 - ✓ Assignment ETC
 - ✓ Task ETC
 - ✓ Primavera Steps
- ✓ Transfer hours and costs to:
 - ✓ Task totals or;
 - ✓ Financial periods

Links to HR, Project Mgt and Finance

- ✓ HMS Software is a Gold Oracle Partner
Primavera, a Certified Microsoft Partner and
a Deltek ISV partner
- ✓ TimeControl includes direct integration with
popular project management systems such
as Microsoft Project and Project Server,
Oracle-Primavera and Deltek's Open Plan
and Cobra. You can move data on a
scheduled or on-demand basis
- ✓ Supports multiple project management
systems and versions simultaneously
- ✓ Customizable import/export function to
interface with virtually any Finance, Billing,
HR, Payroll software or service or ERP
system including Microsoft Dynamics, SAP,
Oracle Financials, PeopleSoft and more

What sets TimeControl apart

1. Install onsite or subscribe online
 2. Mobile, Tablet, Browser interface
 3. Multi-browser, multi-language
 4. Already links to Primavera and other Project Management systems, SharePoint, Excel
 5. Vacation Approvals
- ✓ TimeControl is the most flexible and adaptive timesheet on the market and remarkably fast to implement

Thank you!
